

TITAN III

Versatile H.264 Hybrid 8/16 Channel DVR's

The **Titan III** Series is a versatile DVR which offers H.264 compression engine for the efficient management of HDD usage. As a member of network DVR series, the Titan III provides the capability of connecting IP cameras. Besides, the Dual-Codec recording setup function enables the user to select the recording scenario from **H.264 / MJPEG** compression engine to ensure the picture quality or save the HDD space in the different applications. By the implementation of the GUI, Triplex Operation, NTP, Mobile View Software, **ezBurn** and **ezRecord** functions, the **Titan III** series optimizes the secure environments. The remote software and CMS (Central Management System) software offers the convenience of distant accessibility for remote system control. Furthermore, the optional Unshielded Twisted Pair (UTP) connection reduces cost for the users from the expensive coaxial cabling.

Advanced Functions

- Triplex Operation: Record , Live playback, Network view.
- Supports up to 2 internal SATA HDD's.
- Supports Internal DVD+RW.
- UTP Connection (Optional).
- Dual-Codec for H.264/ MJPEG recording.
- Supports recording of IP camera's(s).
- ezRecord or per channel configuration.
- NTP for time synchronization.
- Mobile viewing software.
- Pre-Alarm recording.
- Motion detection Marker.
- Remote monitoring
- CMS software for large scale video management.

Humane Technology

- GUI.
- USB mouse (Optional).
- Control keyboard (Optional).
- IR remote control.
- Jog Shuttle.
- Touch panel.
- Calendar Search.
